

Cultivating Cannabis

Pruning, Sexing, & Companion Plants Lesson Homework

- Find a friend that has grown cannabis and talk to them about your interests.
- Decide if you want to prune your cannabis on this first grow. If so, go to the resources document and watch the video on pruning!
- Find, make or buy materials for trellising your cannabis plants.
- Review photos of female & male flowers so you know what to look for.
- Explore to see if a neighbor is cultivating cannabis or if you have a cannabis farm nearby. If you do, it's best to make sure you do not let any males grow in your home-grow!
